About Me

A motivated and hardworking Computer Science graduate, committed to delivering excellence and continuous growth. I bring a confident and competent attitude, with a strong desire to apply my skills and contribute meaningfully to any organization I join. Currently awaiting graduation after completing my BSc (Hons) in Computer Science.

Experience

During my academic journey, I have undertaken several projects that reflect my programming skills and problem-solving abilities. While I explored areas like algorithm design and developed tools such as a Tax Calculation System, the most significant project was my final year work —Hamro Sewa.

Hamro Sewa is a full-stack platform built using React and .NET C#, designed to allow users to conveniently hire professionals for household services. This project demonstrates my capability to design, develop, and deploy practical, user-focused solutions using modern web technologies.

Education

High School Degree in Science
Herald Secondary School, Basundhara, Kathmandu.
Grade: 3.39(A)

Secondary Education Examination (S.E.E)
araniko English Boarding School, Madhuban, Bardiya
Grade: 3.55 (A)

Bachelors' Degree (2022-2025)
Herald College Kathmandu

Language

English
Nepali
Hindi

Expertise

- Full-stack Development (React, .NET C#)
- Problem Solving
- Logical Programming

Expertise

- Basic JAVA
- Basic Python
- Basic C#
